SUMMARY STATEMENT

Frontend Developer with 2 years of professional experience and an MCA degree. Specialized in building responsive, high-performance user interfaces using React and Next.js. Experienced in component-driven architecture, state management, and seamless API integration to deliver optimal web performance.

EDUCATION

Goa University **Goa, India**
Master of Computer Applications (CGPA: 8.39) Graduation Date: July 2024

- Activities: Co-ordinator, Astral Coder @ Infofest

WORK EXPERIENCE

Zapcom Group Inc **Bengaluru, India**
Software Engineer Jan 2024 - March 2026

- Architected and delivered proof-of-concept (POC) projects to validate technical feasibility, accelerating feature development cycles.
- Developed and integrated 15+ responsive UI screens and 10+ RESTful APIs, ensuring seamless end-to-end data flow and user experience.
- Modernized legacy codebases by migrating pure JavaScript/CSS implementations to React.js, significantly improving maintainability and performance.
- Engineered a template-driven dynamic form and table framework, automating manual UI generation and reducing development time by 80%.
- Maintained high code standards by conducting thorough peer reviews and providing actionable technical feedback.
- Ensured software quality by authoring comprehensive unit tests using React Testing Library and Jest.

SOFTWARE PROJECTS

ShortList - Link

- Developed a web application using Next.js that automates resume evaluation, delivering actionable feedback to improve candidate shortlist rates.
- Integrated the Gemini API to analyze parsed resume data, generating performance scores and detailed critiques that improved mock ATS scores by an average of 35%.
- Built an interactive analytics dashboard using Tailwind CSS, Aceternity UI, and Framer Motion to visualize skill distributions and data charts, increasing user engagement by 40%.
- Achieved an 85% positive user feedback rate, with users reporting a significant improvement in their resume clarity, formatting, and impact after applying the AI suggestions.

BluePrint

- Developed a full-stack project management application with a Next.js frontend deployed via AWS Amplify for edge delivery and a Node.js backend hosted on AWS EC2.
- Architected a relational data model with PostgreSQL on AWS RDS, utilizing Prisma ORM for type-safe queries and implementing connection pooling to handle high-concurrency workspace updates.
- Built a responsive user interface combining Material UI for standardized, accessible components and Tailwind CSS for custom layouts, ensuring a highly scannable workflow view.
- Implemented client-side state management and data caching using Redux Toolkit and RTK Query, enabling optimistic UI updates and reducing redundant network requests for task mutations.
- Integrated AWS Cognito to manage multi-tenant user authentication and token issuance, ensuring secure data isolation between organizational workspaces.
- Engineered an AWS S3 file attachment system using pre-signed URLs, enabling direct client-side uploads to minimize server bandwidth.

SKILLS & INTERESTS

Software : (proficient): HTML/CSS, JavaScript, TypeScript, React.js, Next.js, Redux Toolkit, Tailwind CSS, Node.js, MongoDB, Git. (familiar): C, C++, Python, SQL, Docker, AWS
Interests: Reading Books, Football, Playing musical instruments, Video Games
